RE: **New Med-Eval Partnership & Platform Rollout**

To Our Med-Eval Partner Network:

I am pleased to announce an exciting new partnership with CORELinQ Innovations that has allowed us to bring to each of you a dynamic new state of the art radiology platform, **Med-ELinQ**.

In our quest to find the best technology solution to partner with, it became clear that CORELinQ was the undeniable choice. CORELinQ Innovations is a leader and innovator in radiology, providing a suite of industry-leading products and services. This includes image distribution/viewing, report management and distribution, and fully integrated RIS/billing and RCM services. All of these will improve workflow and reduce costs without compromising patient care. CORELinQ CEO, Harsha Hatti, and I both share the same vision, passion and commitment to serving our clients with the tools and solutions needed to help our customers succeed.

This shared vision is demonstrated through our new platform offering, Med-ELinQ. Med-ELinQ is an internet based platform that directly connects Med-Eval's clients, imaging centers and patients through a secure HIPAA compliant portal. Workflow management will become faster and report turnaround quicker as the platform eliminates the need for cumbersome manual faxes and emails or the constant back and forth currently required with telephone scheduling. No longer will the imaging center receive a request to copy images to discs for mailing to providers or payers – these images and reports will now be stored on the Med-ELinQ platform and available to view or to send electronically to those needing access.

To ensure all of our clients are successfully added to the Med-ELinQ platform, CORELinQ has dedicated a team of resources to work with our network directly. This team, led by Trey Cassell, will be reaching out to you to gather the site information needed for a speedy, efficient, and precise installation. An installation quick-guide is attached for your reference. If you have questions on the install process, feel free to contact Trey by phone at (717) 353-0244 or by email at trey.cassell@corelinq.com.

I am thoroughly convinced that Med-ELinQ will redefine the network imaging model by providing efficiencies and reduced administrative costs to imaging centers and payers. This milestone is sure to be a game changer and I look forward to the growth and overall success that I firmly believe awaits all of us in this endeavor. Thank you for being such a valued partner to Med-Eval.

Sincerely,

Michael J. Valasek
