

Dear Provider:

One Call Care Diagnostics (One Call) is proud to announce its partnership with CORELinQ Innovations and the joint launch of **OneLinQ**, a new radiology solutions platform that will enhance overall service delivery for One Call's imaging center provider network.

By bringing together the best in One Call's worker compensation claims service delivery and CORELinQ's state of the art imaging and workflow software solutions, the **OneLinQ** platform creates an integrated workflow that gives patients and the centers remote scheduling capability through a secure HIPAA compliant portal. The need to depend on telephone scheduling or manual telephone reminders is no longer needed. Once an exam is completed, the image is made available to radiologists who are able to quickly retrieve the image, read the image and from here, upload a medical report into the **OneLinQ** portal. With a secure login and password, both patients and physicians may access **OneLinQ** on-demand, to review medical reports for worker compensation processing. No longer will the imaging center rely on copying images to discs for mailing purposes to providers and payers, or to manually fax reports — these images and reports will now be stored on the **OneLinQ** platform and available to view or to send electronically to those needing access. The productivity gains resulting from **OneLinQ** will help to facilitate the increase of referrals from surrounding out of network providers looking for an efficient and technology savvy partner to serve their patients.

One Call VP, Stephen Ellerman, commented, "Our partnership with CORELinQ plays a key part in our overall strategy for providing our provider network with efficient and scalable solutions that enhance their operations and overall service delivery. CORELinQ's suite of products provides us with a variety of options that best support our strategy. We view this as a win-win for all involved and look forward to a strong future together with CORELinQ".

CORELinQ's CEO, Harsha Hatti, added, "We firmly believe this partnership with One Call will redefine worker compensation solutions as many know them today. CORELinQ has never hidden the fact that our focus has and will remain providing radiology centers with solutions that improve workflow, reduce costs and increase reimbursements without compromising patient care. We are happy to be One Call's vendor of choice in this endeavor".

OneLinQ will be rolled out to One Call's radiology provider network beginning in the Spring of 2016.

About One Call Care Management

One Call Care Management (One Call) is the nation's leading provider of specialized solutions to the workers' compensation industry enabling faster,

more efficient and more cost-effective claims resolution. With a focus on injured workers' needs across the spectrum of care, One Call enables maximum medical improvement and superior outcomes.
